Art Unit: 1773

1. Claims 2 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, it has been held, that the recitation that an element is "capable of" performing a function that is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138.

2. Claims 1-40 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not describe how is the composition by structure of the essential part of the invention which is a semi-permeable membrane; the, specification does not describe in a clear and sufficient manner what is meant by "semi-per^{me}usable".
